

# Other Western Canadian Wheat Classes

## CANADA NORTHERN HARD RED

**CNHR** is a red spring wheat with hard kernels. Introduced on August 1, 2016, the target quality of this class is for it to have sound kernels (good falling number), very good milling quality, with medium gluten strength (lower than both the CWRS and CPSR classes). Protein content of CNHR will be variable and span the protein content range of the CWRS and CPSR classes. There are three milling grades available.

Depending on protein content, CNHR will be suitable for the production of pan breads, hearth breads, flat breads and noodles.
